New Education Book Could Increase Student Learning and Student Achievement

Dallas, Texas, March 21, 2016 — /EPR NETWORK/ — Building Instructional Capacity is a new education book by educator and author, Dr. Stanley T. Crawford that could increase student learning and student achievement.

At a time when solutions to increasing student achievement are being discussed, Building Instructional Capacity is a book that shows education leaders at the district and campus levels a model to achieve, just that.

After discussing the importance of leadership, Dr. Crawford presents the three key strategies for Building Instructional Capacity. There are many actionable components for education leaders to follow.

Building Instructional Capacity is an education book for education leaders at the district and campus levels.
