New and Improved OfficeJet Pro Portfolio – New Smart Printers and Business Tools

Irwindale, California, USA, 2019-Oct-11 — /EPR Network/ — HP released an improved OfficeJet Pro and smart printers that enable customers to work faster on core goals, to do new tasks smartly and to keep all their privacy intact with an upgraded security system and a self-serving internet connection. It is all 39% smaller in size, and more portable, too.

The Unveiling of the New Products

HP Reinvent is HP's biggest global event.

This new series was released in anticipation of HP Reinvent, and they were specifically targeting small business operations.

A reinvented and drastically improved design, it is a combination of the creativity of 20 countries and has been designed for 3 years to be time-saving, space-saving, secure, smart and mobile. OfficeJet Pro is a stepping stone for businesses to achieve breakthroughs in efficiency, performance and professionalism. It is one of HP's finest and most successful designs yet.

The Features of the OfficeJet Pro

Time-Saving

It has a feature called Smart Tasks which ensures that you don't have to go through each step repetitively. It turns organizing documents, scanning, printing on both sides of the paper, sending to cloud storage, emails and other features into automated steps. There is a feature that enables scanning and searching of documents from the phone or the printer.

Increased Mobility

This feature means that a customer can always remain connected to work no matter where they are. HP Smart app can be installed on phones – making printing, scanning and copying only one tap away.

Cost-Effective

The Premier series provides 2 years' worth of ink in the HP inkjet cartridges. There is a business plan available for inks, which manages and provides high-volume printing businesses with enough ink for a month.

Every time the HP inkjet cartridges are low on ink, it is automatically ordered.

Heightened Security with Better Connectivity

The security is top-notch. There is nothing more valuable to a business than maintaining control and privacy. The self-sustaining internet connection makes sure that there is never a lapse in connectivity.

Made from Sustainable Sources

The hardware was created to reduce the use of energy. The paper is sourced responsibly and the HP inkjet cartridges of are recyclable materials. The two series, 8000 and 9000, are made out of printers and electronics that were recycled – 15% and 10% recycled plastic respectively.

Easy to Use

This series is guaranteed to enhance the user experience. The 9000 has a laid-off platform for the easy- Grabbing of documents from the scanning bed, while the 9025 has a tray for output documents that ensures there are no paper spills.
