

Tarps Now® Expands Mesh Tarps Providing Wide Range of Exposure Levels and Applications

St. Joseph, Michigan, United States, 2019-Nov-15 — /EPR Network/ — Tarps Now® is pleased to announce the addition of new lines of Mesh Tarps that offer a wide range of uses and applications which includes applying Mesh tarps as protective coverings around homes, animal habitats and other outdoor structures. To meet these needs, Tarps Now® custom manufactures protective mesh tarp coverings in a variety of mesh screen exposure ratings, weights, fabric grades and colors, that are all engineered to provide outstanding levels of protection from high winds and intense sunlight, where extended exposure to Ultra Violet radiation is recognized to contribute to skin cancer and other ill health effects.

Mesh Tarps offered by Tarps Now® are often placed in service as Windscreens at, or near, commercial kennels, outdoor livestock buildings, warehouses and other outdoor structures requiring extended levels of UV protection and wind resistance. Applications for these new lines of Mesh Tarps also extend to uses in and around homes, such as patios, decks, thresholds, gazebos, pools, picnic areas, barns, kennels and other outdoor recreational areas.

In addition to the foregoing, many businesses are adopting the use of Mesh Tarps to protect employees who work in areas where prolonged exposure to the elements exists such as in agricultural processing areas, animal feedlot areas, shipping and receiving areas, and many other applications. To meet these needs, Tarps Now® has developed a complete line of materials and design to provide very specific levels of exposure, as well as the ability to choose from standardized sizes, or to elect a high degree of customization to meet very

specific applications that includes industrial strength debris netting, fire retardant mesh tarps, hurricane grade mesh tarps and other types of specialty applications. Details on exposure rated Mesh Tarps are as follows:

Tarps Now® Mesh Tarps per Exposure Rating:
